

The MORE Athlete enterprise vision

One academy today.
A continuing development
record for the future.

The destination

**An athlete's development story
can remain useful as their world changes.**

**FOR THE
ATHLETE**

What should I work on, and what did we learn last time?

FOR THE COACH

What does this athlete need from me now?

**FOR THE
PROGRAM**

Where does our development process need attention?

The six stages

01	02	03	04	05	06
LAUNCHPAD	PLAYBOOK	ACADEMY OS	ATHLETE PASSPORT	NEXT LEVEL	ATHLETE NETWORK
Prove useful coaching	Repeat the experience	Support the whole program	Carry a trusted record forward	Connect the next opportunity	Serve connected institutions

Each stage creates the foundation for the next.

The Epic / Total Expert lesson

EPIC

A continuing person-centered record supports work across changing care settings.

TOTAL EXPERT

A useful product and a real pilot can earn a broader institutional deployment.

For MORE: useful work, trusted history, greater responsibility.

The development loop

- UNDERSTAND** Youth BOS: the person. Youth APA: their current sport reality.
- EXPLORE** Coach methodology and MORE help examine possible futures.
- AGREE + ATTEMPT** Athlete and coach choose one move, then try it.
- RETURN + REVISE** Record what happened, correct the understanding, adjust the plan.

The next conversation begins with the last agreement.

01 LAUNCHPAD

One academy proves that MORE helps development.

BUYER / USERS	One academy or defined program, potentially Beyond Sports. Athletes and coaches use it. Lisa shapes her own methodology.
STATE ADDED	Goals, current reality, agreed work, attempts, outcomes and corrections.
PROOF TO ADVANCE	Repeated usefulness, accurate plans, manageable coach effort and paid continuation.

What LAUNCHPAD must demonstrate

- ATHLETE VALUE** The athlete understands the next step and returns for useful help.
- COACH VALUE** The conversation improves without adding a recordkeeping job.
- RECORD QUALITY** The agreed plan stays accurate when people disagree or correct it.
- BUYER VALUE** The academy can explain the benefit and chooses to continue paying.

Agree on the measures before the first development cycle.

02 PLAYBOOK

Other academies can use the same core experience.

BUYER / USERS	Two to four additional academies or competitive clubs. Ordinary coaches and athletes, with their own director.
STATE ADDED	Reusable setup, approved methods, onboarding lessons and delivery costs.
PROOF TO ADVANCE	Independent buyers renew without custom rebuilds or constant founder support.

What repeats, and what varies

SAME MORE FOUNDATION

Development loop
Evidence and corrections
Permission rules
Continuing record

EACH ACADEMY'S CONTEXT

Coaching methodology
Sport and age group
Staff responsibilities
Program goals

A new academy configures the product without rebuilding it.

03 ACADEMY OS

The academy runs its development work through MORE.

BUYER / USERS	Academy leadership, larger clubs or multi-site operators. Directors and assigned staff support athletes and coaches.
STATE ADDED	Coach assignments, review status, shared commitments and program history.
PROOF TO ADVANCE	Leadership uses it in recurring reviews and renews for measurable program value.

The academy's working view

WHAT IS ACTIVE? Who is working on what, with which coach, and by when?

WHAT CHANGED? Which attempts, outcomes or corrections need a review?

WHERE DO VIEWS DIFFER? What does the athlete say, and what does the coach observe?

WHAT NEEDS ACTION? Which agreements have gone unreviewed or lost an owner?

Staff see actionable development work with attributable evidence.

Own the state, rent the intelligence

MORE MAINTAINS THE RECORD

- Identity and permissions
- Goals and accepted plans
- Evidence and corrections
- Attempt and outcome history

AI HELPS WITH THE WORK

- Use permitted context
- Explain possible choices
- Draft a useful next step
- Support the next conversation

Models can change. The authorized development history continues.

How a proposal becomes an agreed plan

1 CHECK ACCESS

Identify the person, role, purpose and permitted record.

2 ASSEMBLE CONTEXT

Retrieve relevant, dated evidence and the approved coaching method.

3 PROPOSE

AI helps explain options. Missing facts remain unknown.

4 CONFIRM + RECORD

The appropriate people accept a plan. MORE records the change and source.

An AI suggestion becomes an agreement only through confirmation.

MORE works alongside existing tools

SCHEDULING + BILLING

Keep registration, calendars, tournaments and payments in their tools.

VIDEO + WEARABLES

Use authorized footage and measurements with source details.

SCHOOLS + CLUBS

Obtain roster, graduation and competition facts from appropriate sources.

MORE

Connect relevant evidence to development decisions and follow-through.

Useful integrations expand the record without replacing every system.

Three distinct permission boundaries

PRIVATE DEVELOPMENT

Candid reflection and sensitive context.
Access stays within its agreed purpose.

SHARED COACHING

Approved goals, coach contributions, plans and appropriate progress.

RECRUITMENT PACKET

A separately authorized selection of relevant, evidenced information.

Paying for the program does not unlock an athlete's private history.

04 ATHLETE PASSPORT

Selected development history follows the athlete.

BUYER / USERS	Sponsoring or receiving programs. Packaging remains to be tested. The athlete and authorized current or next coaches.
STATE ADDED	Sourced observations, measurements, competition evidence and sharing history.
PROOF TO ADVANCE	A receiving coach uses the record, understands its sources and respects its limits.

What makes the passport trustworthy

GOALS + WORK What the athlete wants and what the athlete and coach agreed.

OBSERVATIONS Who observed what, in which setting, and on what date.

MEASUREMENTS Method, units, conditions, date and verification status.

HISTORY + LIMITS Attempts, outcomes, corrections and unresolved uncertainty.

Every important claim should lead back to its supporting evidence.

05 NEXT LEVEL

Trusted evidence supports recruiting and the next environment.

BUYER / USERS	College programs or pathway partners. Paid value needs testing. Opted-in athletes, authorized recruiters and receiving coaches.
STATE ADDED	Recruitment packets, current interest, evidence checks and transition permissions.
PROOF TO ADVANCE	Recruiters return, opportunities are relevant and partners see ongoing value.

“A left-footed senior winger”

**“I need a left-footed left winger.
Senior. Fast. Interested in our level.
Who should I look at?”**

CLARIFY “FAST”	Acceleration, top speed or match-play evidence? Define the criterion.
CHECK THE RECORD	Graduation year, position, preferred foot, interest and recent evidence.
RESPECT VISIBILITY	Search only athletes who authorized this recruiting use.

A search result with visible limits

Illustrative result: three athletes meet the basic criteria.

ATHLETE A	Recent comparable acceleration test. Source and date attached.
ATHLETE B	Recent comparable test and match footage. Both available for review.
ATHLETE C	Relevant match footage. Comparable acceleration test is missing.

Two have measured speed evidence. The third still needs verification.

The relationship can continue after recruiting

BEFORE THE MOVE

The athlete chooses a limited packet for the opportunity.

AT THE HANDOFF

The next program requests the context it needs and confirms permissions.

AFTER ARRIVAL

A new coach reviews goals, prior work and what still needs attention.

Recruitment is an event. Development continues.

06 ATHLETE NETWORK

Institutions work around continuing athlete records.

BUYER / USERS	Academy groups, college departments, leagues or federations. Athletes, coaches and authorized program leaders.
STATE ADDED	Permissioned relationships, transitions and comparable intervention/outcome history.
PROOF TO ADVANCE	Institutions renew, handoffs work reliably and learning preserves privacy and uncertainty.

What the network could make possible

COLLEGE PROGRAM

Understand an incoming athlete with selected development context.

ACADEMY

See where athletes progress and where a handoff lost continuity.

MULTI-SITE ORGANIZATION

Find gaps in development support across its authorized programs.

LEARNING OVER TIME

Study which approaches are associated with progress in comparable situations.

An improvement after an intervention does not prove causation.

A business at every stage

ACADEMY

Organizational subscription, with scoped setup and possible active-athlete pricing.

LARGER PROGRAM

Multi-team or multi-site agreements for staff workflows, support and integrations.

NETWORK

Potential evidence or workflow services, or distribution partnerships.

The academy business must work before a national network exists.

The first concrete partner plan

PARTNER + PROBLEM

Confirm the buyer, age group and recurring coaching problem.

METHOD + PERMISSION

Agree on Lisa's contribution, usage rights and who can see what.

PROOF + ECONOMICS

Choose a development cycle, usefulness measures and continuation terms.

REPEATABILITY

Use what we learn to approach the next similar academy.

Beyond Sports could be where the journey begins.

**A continuing record.
A wider circle
of useful support.**

**Athletes, coaches, academies, clubs,
colleges and development programs.
Connected through legitimate permissions.**

**The first proof is better development
inside one academy.**
